Project ???

What is that?

Customer
User
Financiers
Phases
Other Projects
Stakeholders
Progress
Risk Managemt
Goal
Plan
Plan B
Purpose
Project
Sub goals
Evaluation
Resources
Roles
Division Manager
Time
Money
Personnel
Project Leader
Specialist
Project Owner

What is **not** a project?

Project Phases

Definition Phase

- Define what the goal of the project is

Planing Phase

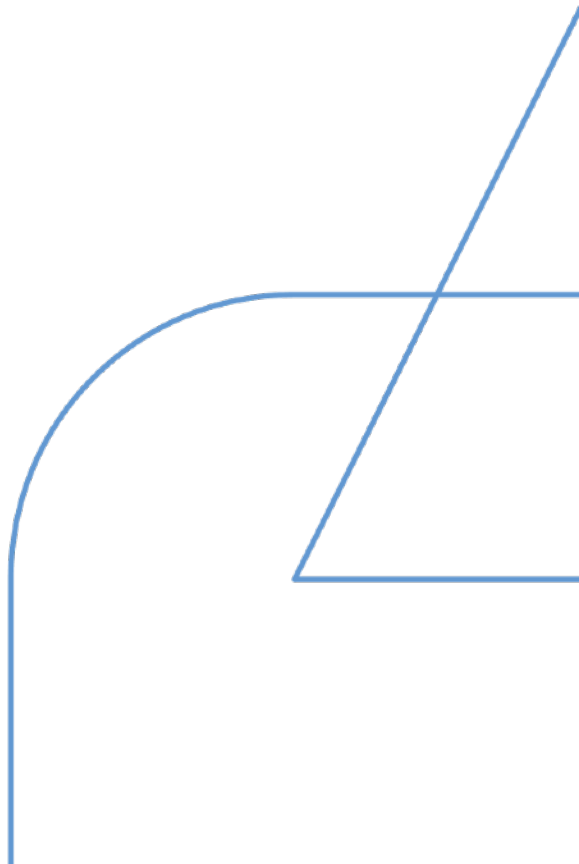

- What resources are needed?
- Split the project into sub-projects, phases, deadlines, ...
- Assign roles and responsibilities

Work and Control Phase

- Track progress, adapt

Finalization

- Document, learn for future projects

Action Point List

5. Action item overview

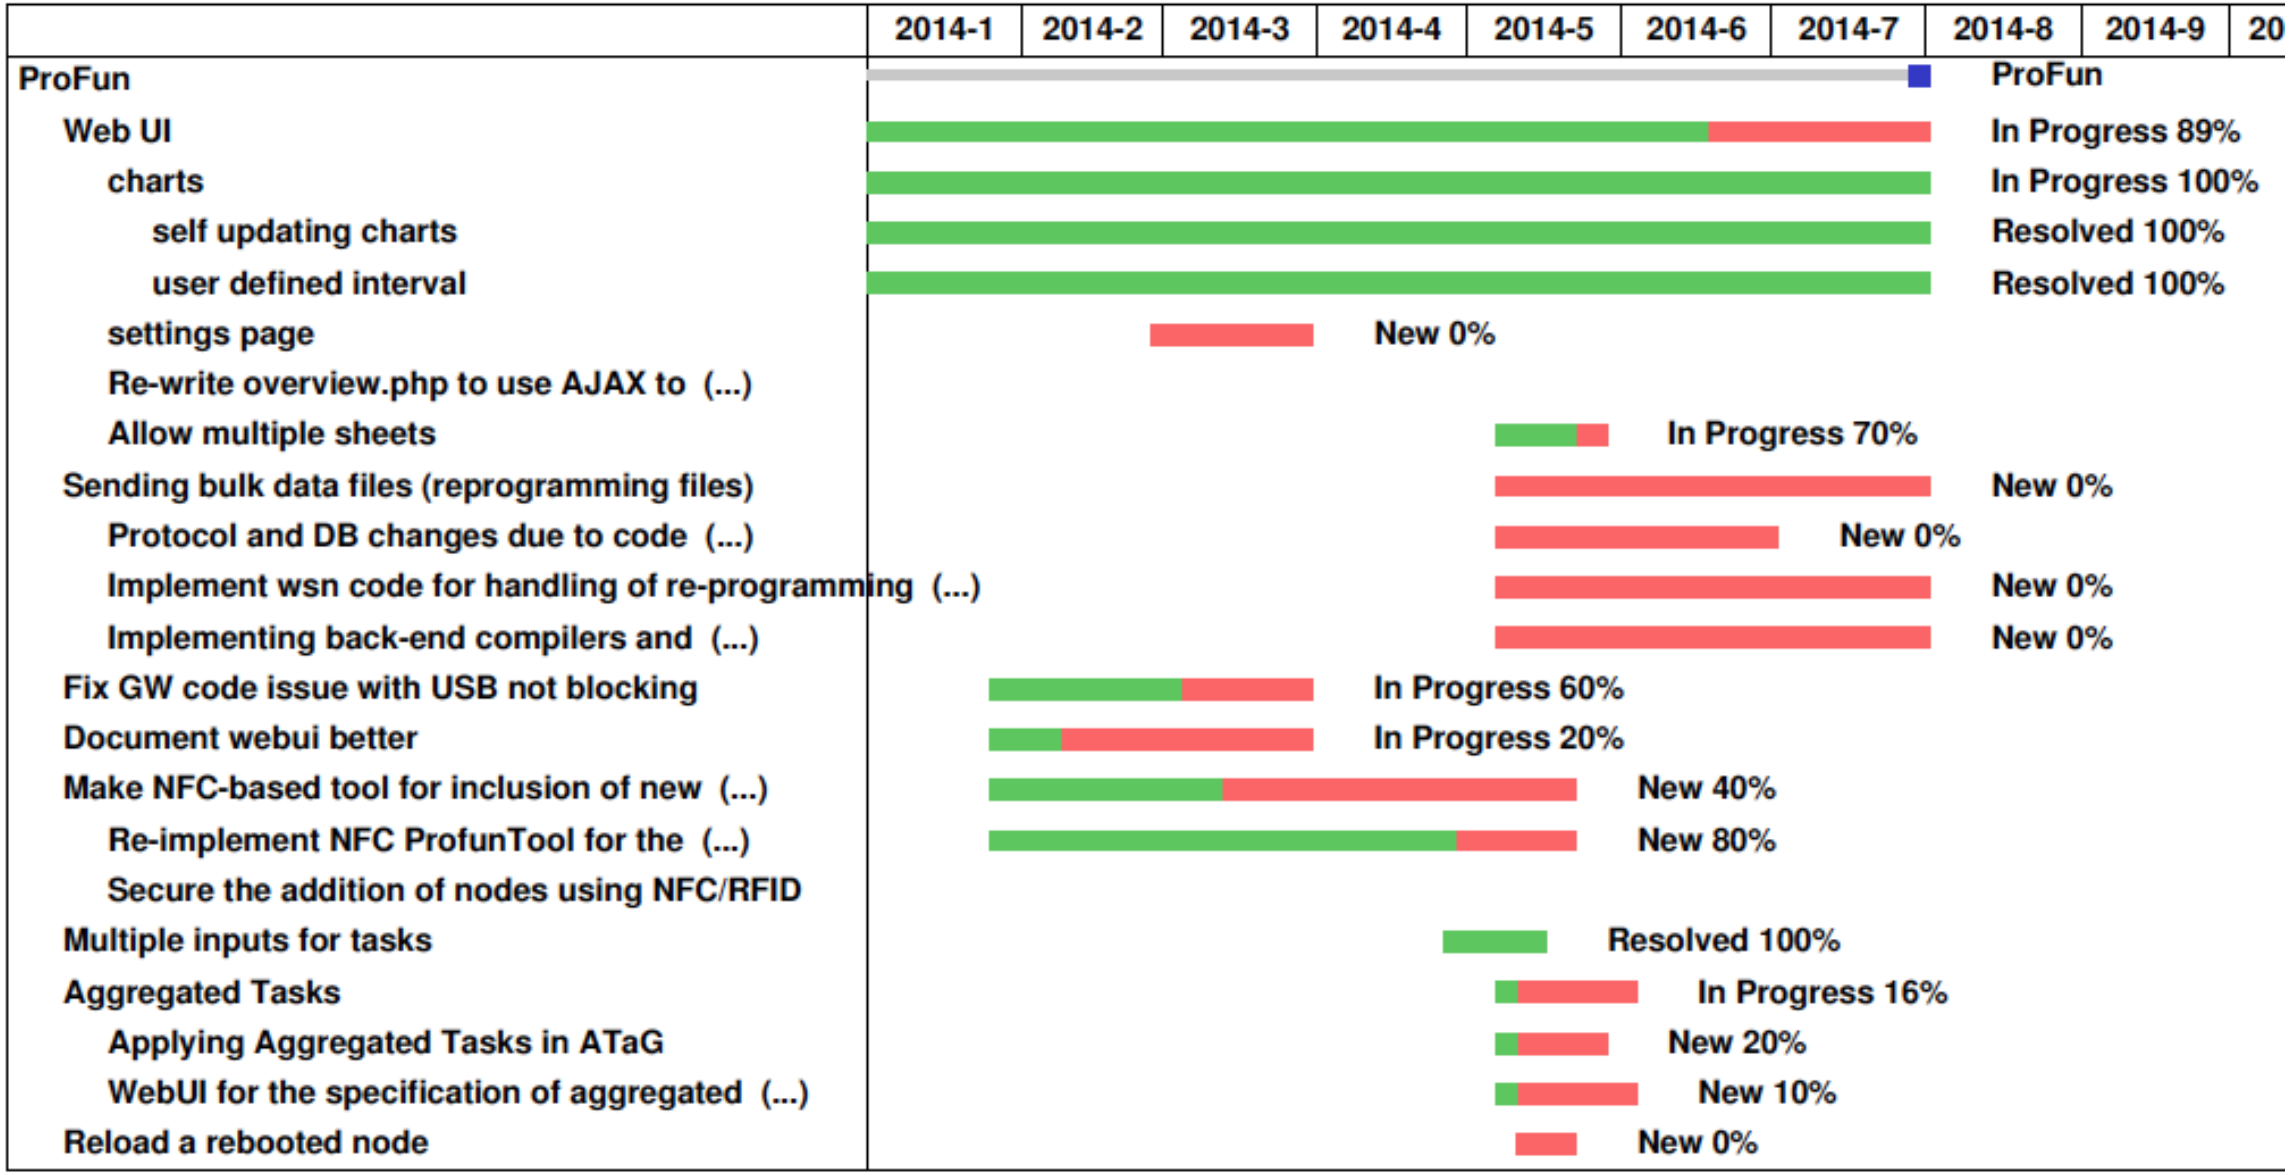

February 8, 2008 Eindhoven

AP#	Topic	Who	By When
110208-1	Update project plan so that WPA consists of three tasks (architecture, detailed components, standardization)	Bram	
~~110208-2~~	~~Initiate deliverable A.1.1~~	~~Martin J.~~	~~Done~~
~~110208-3~~	~~Organize a joint meeting with WPB~~	~~Martin J.~~	~~Feb 22~~

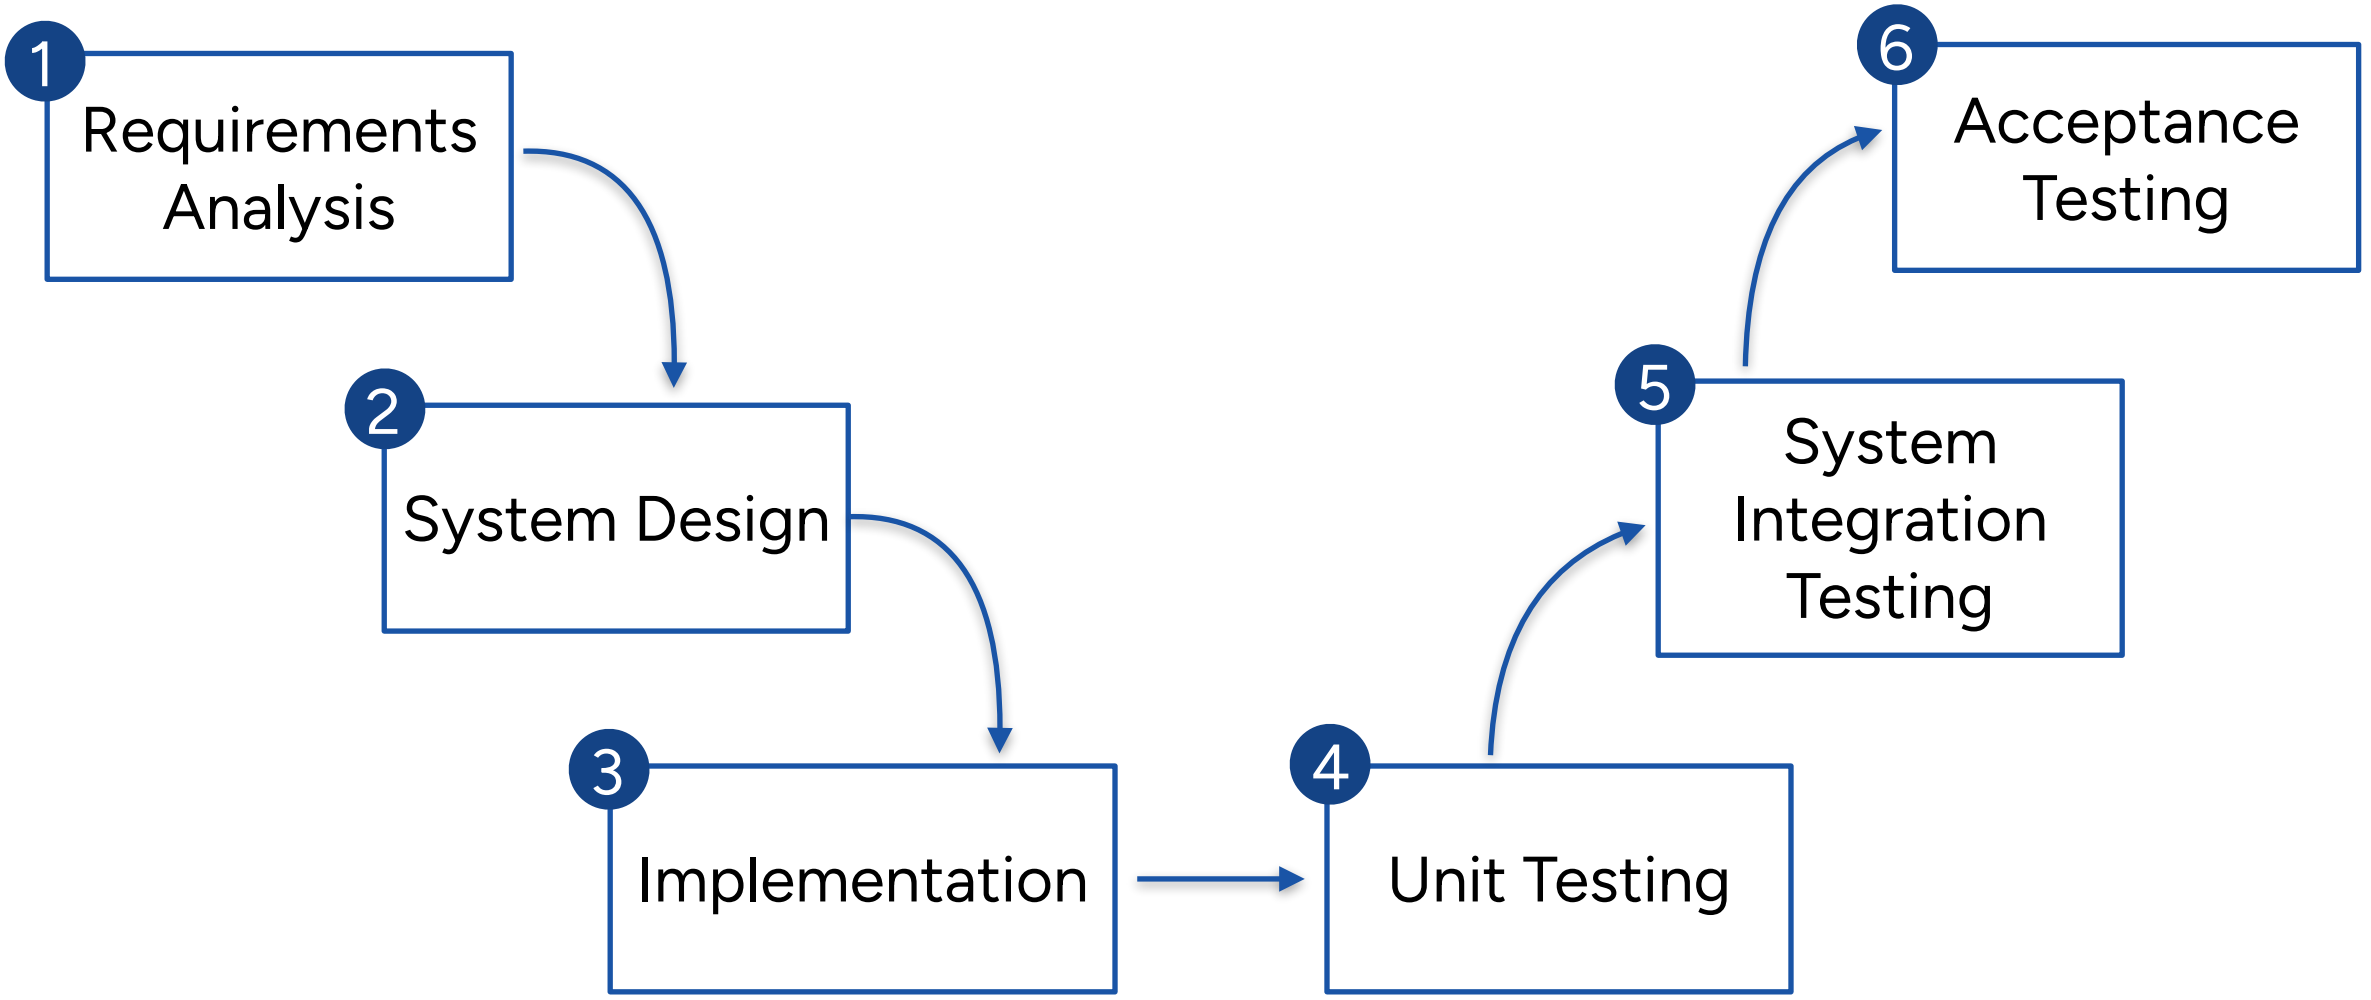

February 22, 2008 Delft

AP#	Topic	Who	By When
220208-1	Since the theoretical model will be the link between the three level technical architecture and WPC, discuss the usability of TM with WPC.	Rieks	
220208-2	Provide input for the requirement section of deliverable A.1.1.	Frank?	Feb 29
220208-3	Reorganize deliverable A.1.1 and provide new input regarding all the architectural views	Martin J, Rieks, Edsger	Feb 29

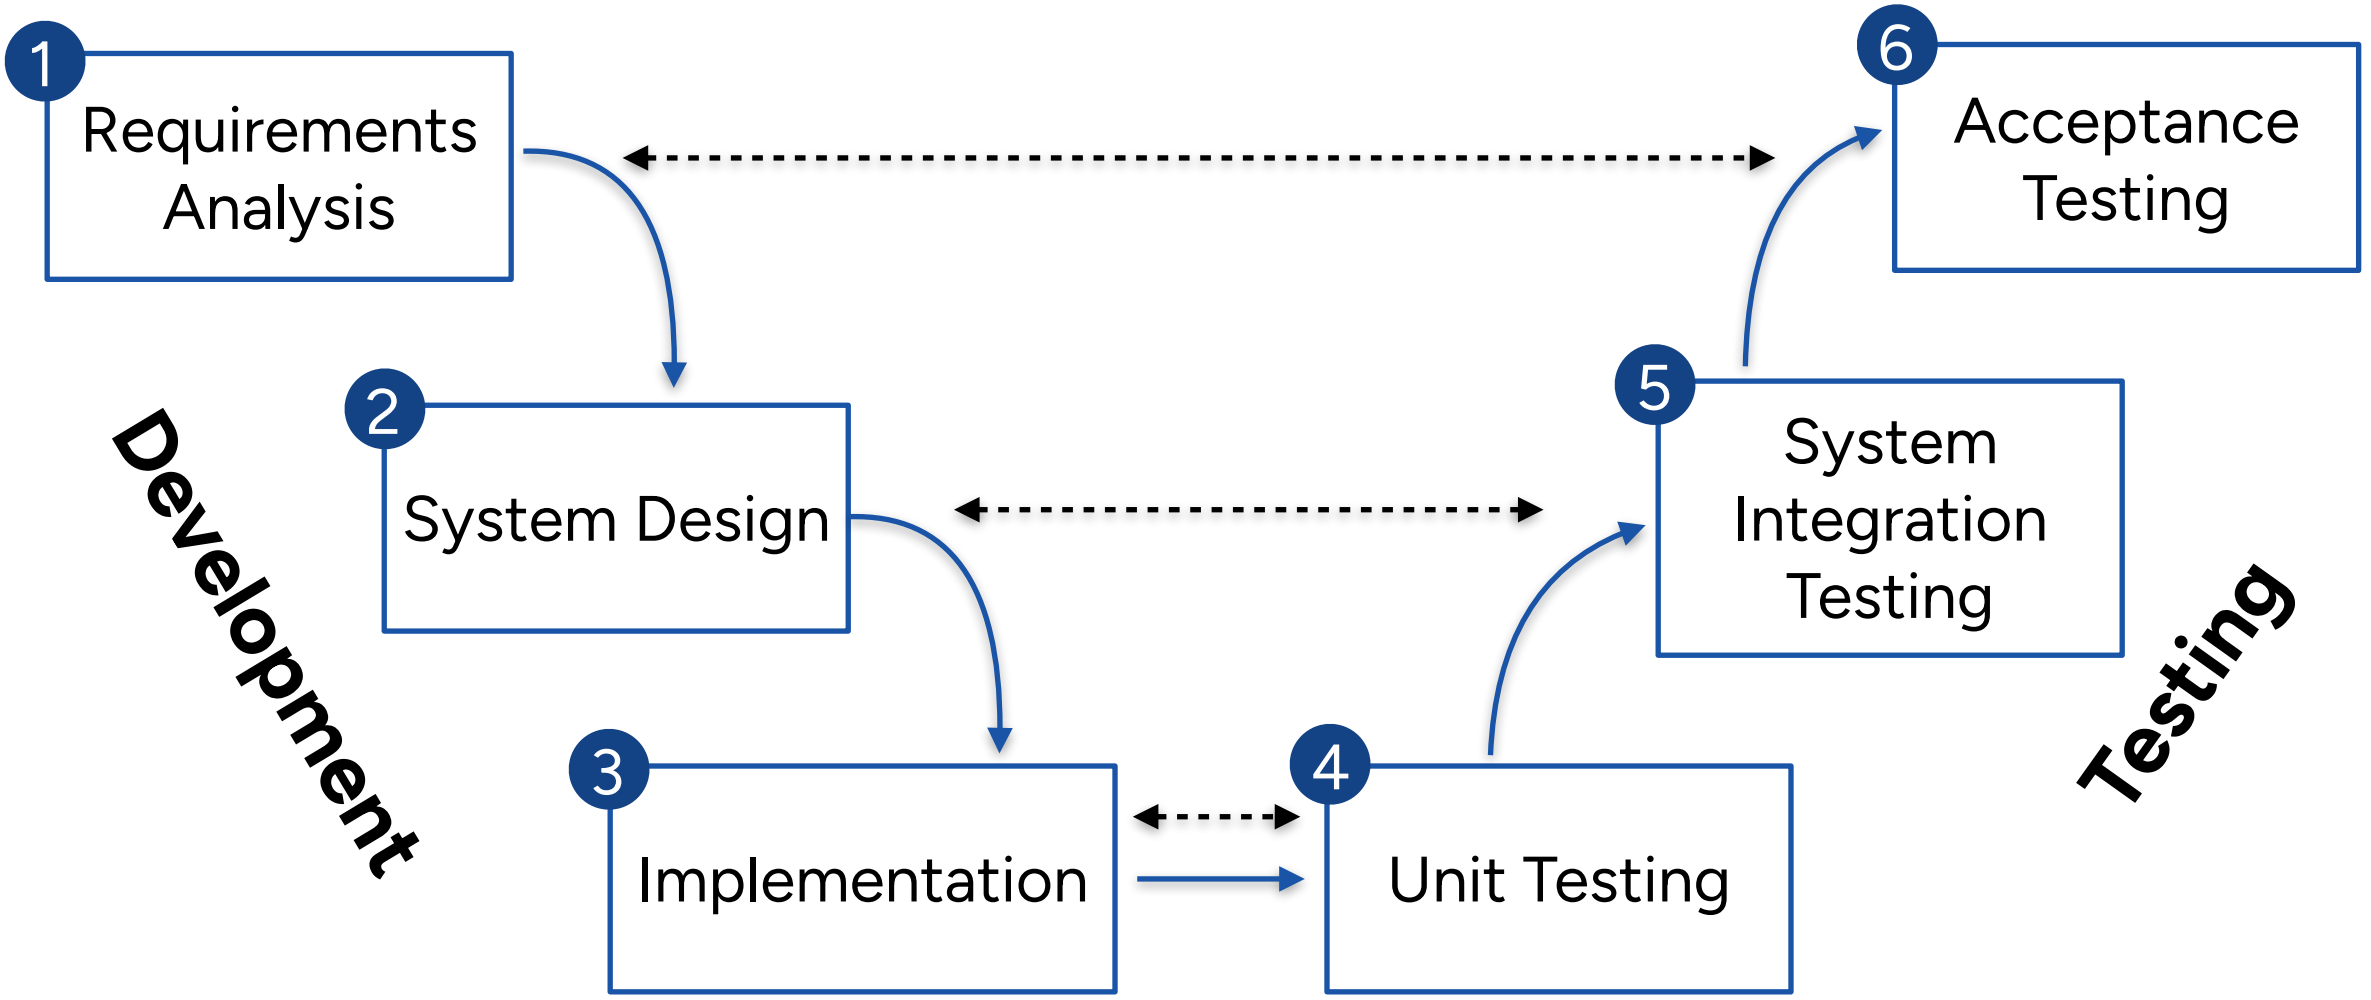

Work Breakdown Structure (WBS) - Gantt

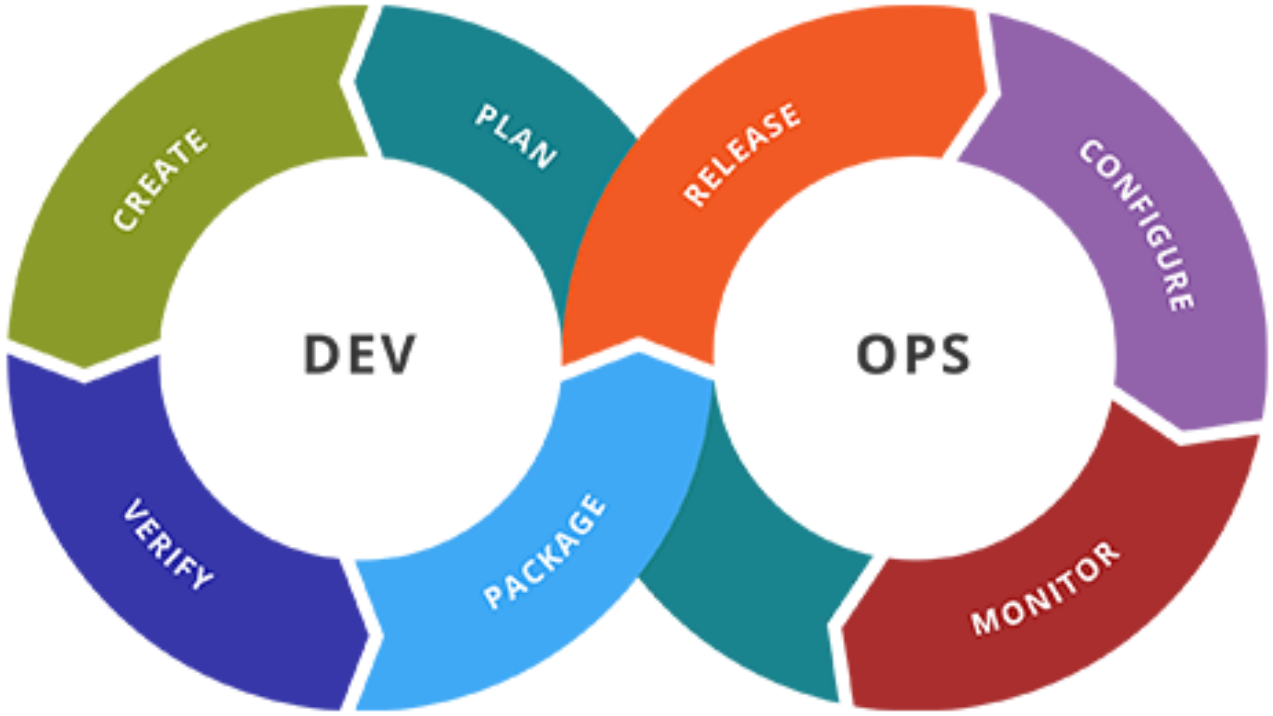

Waterfall Model

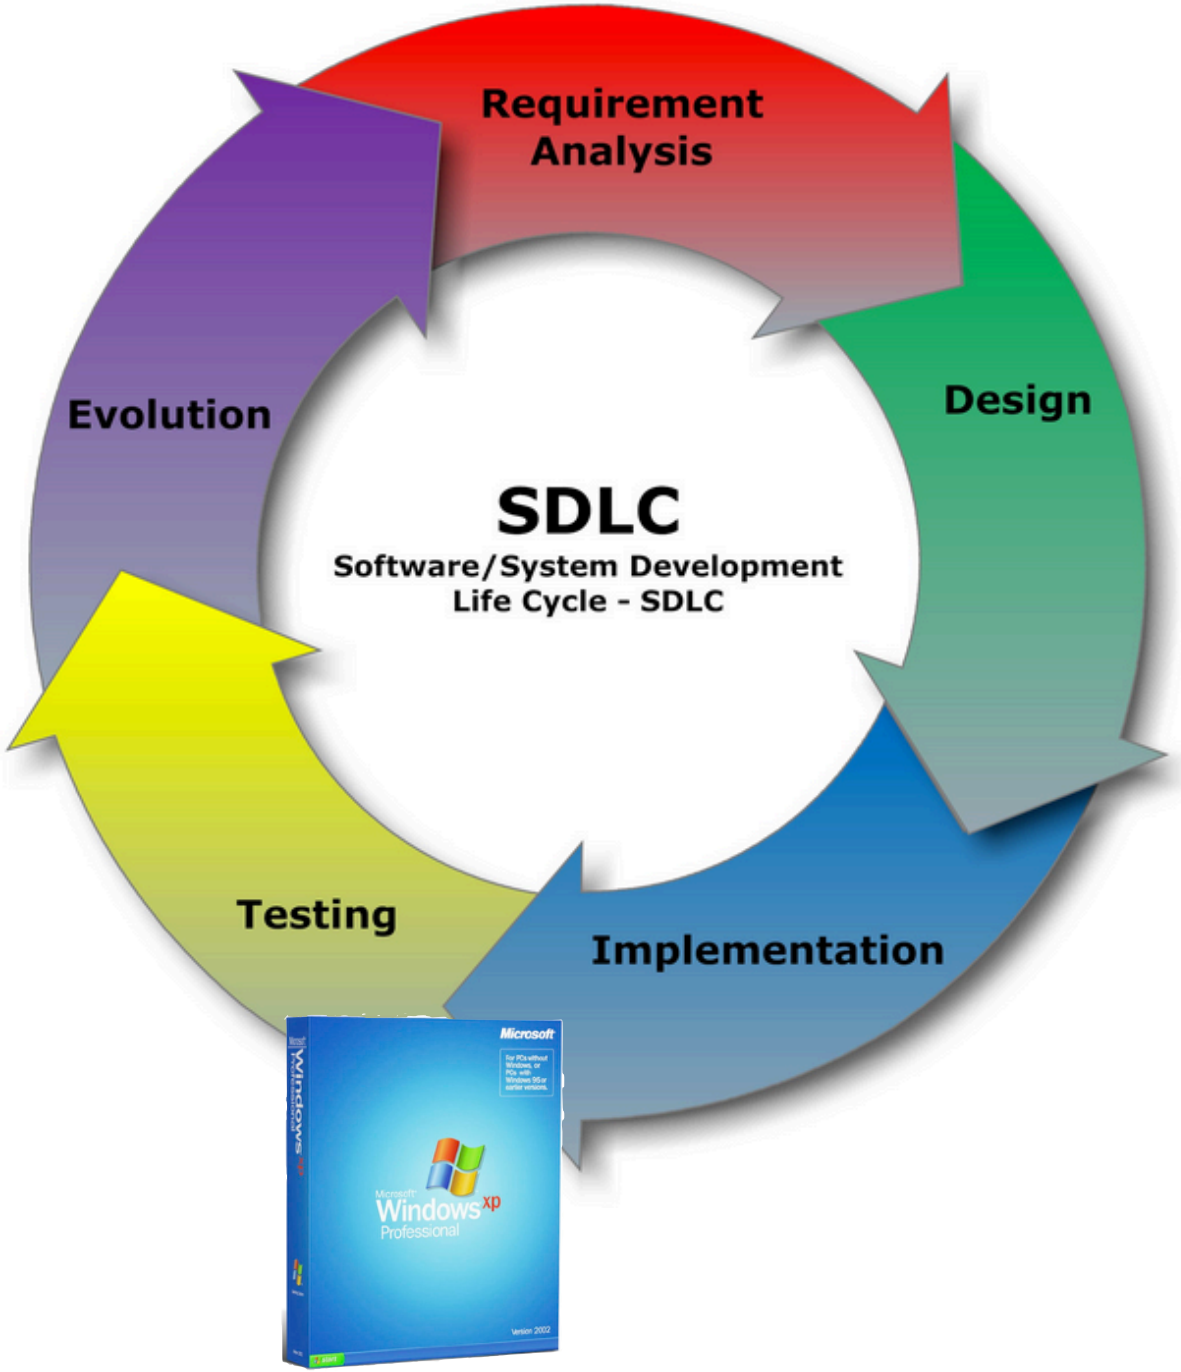

Waterfall Model (Variant: the V-Model)

Software Lifecycle

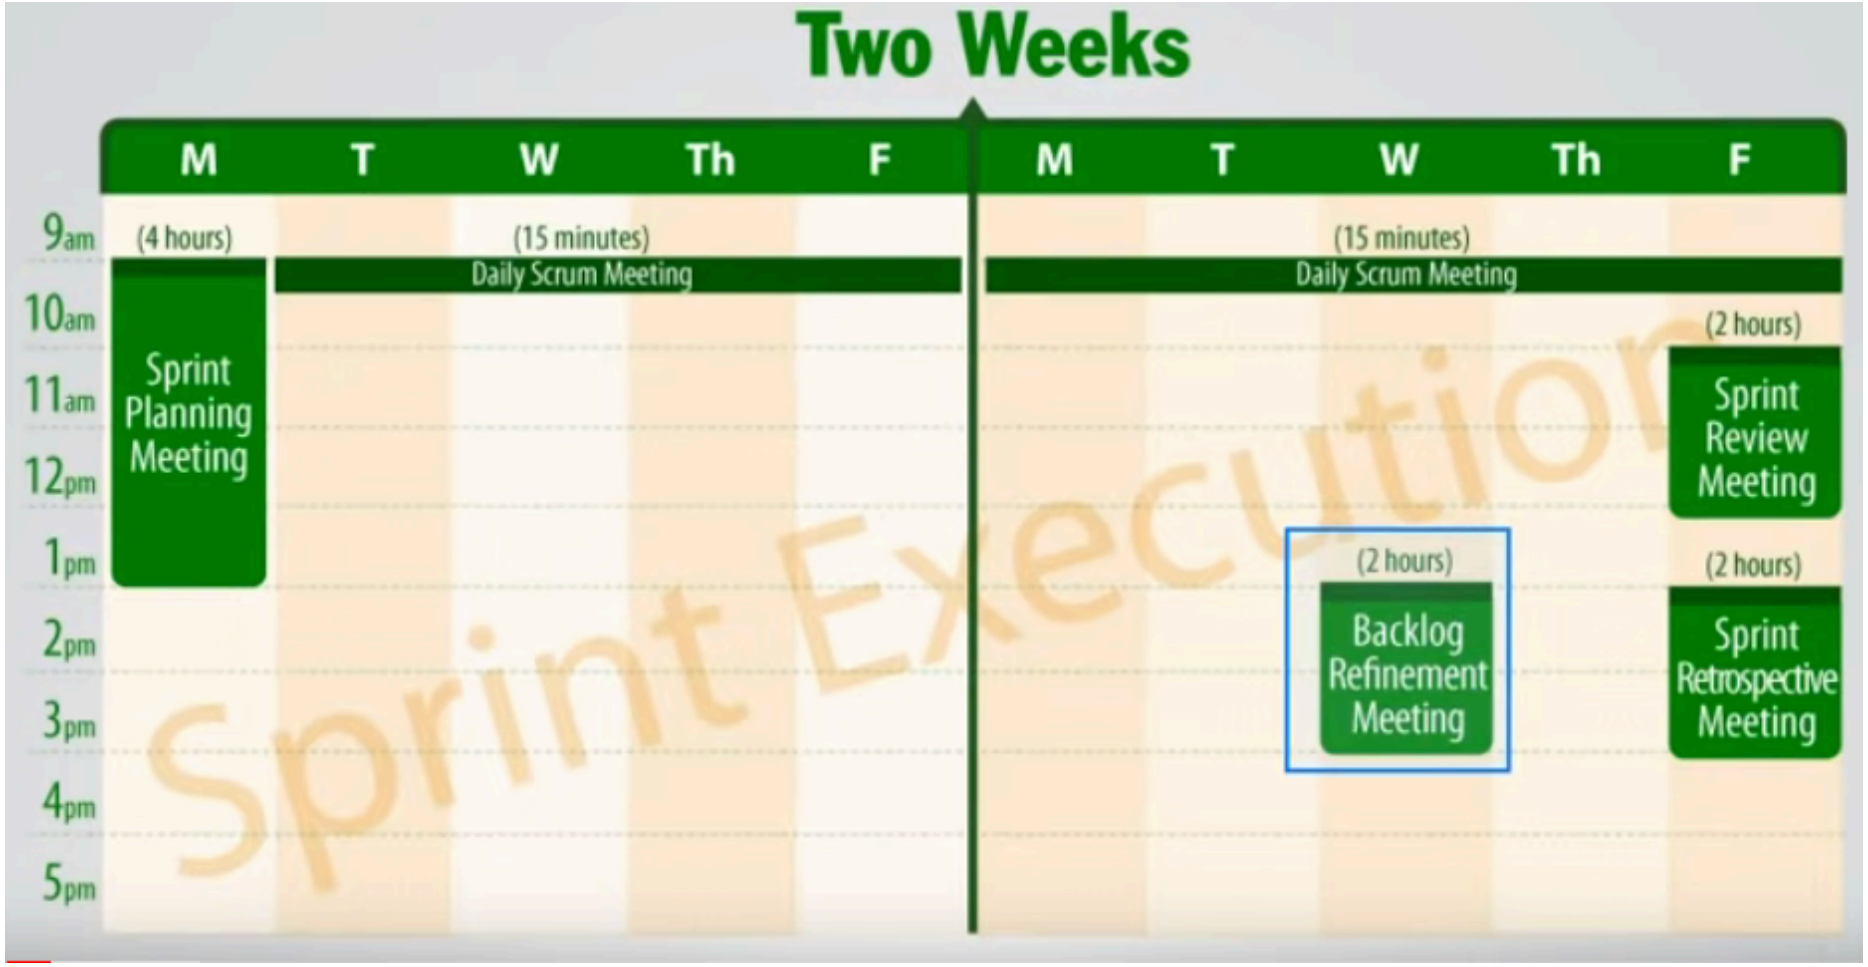

facebook

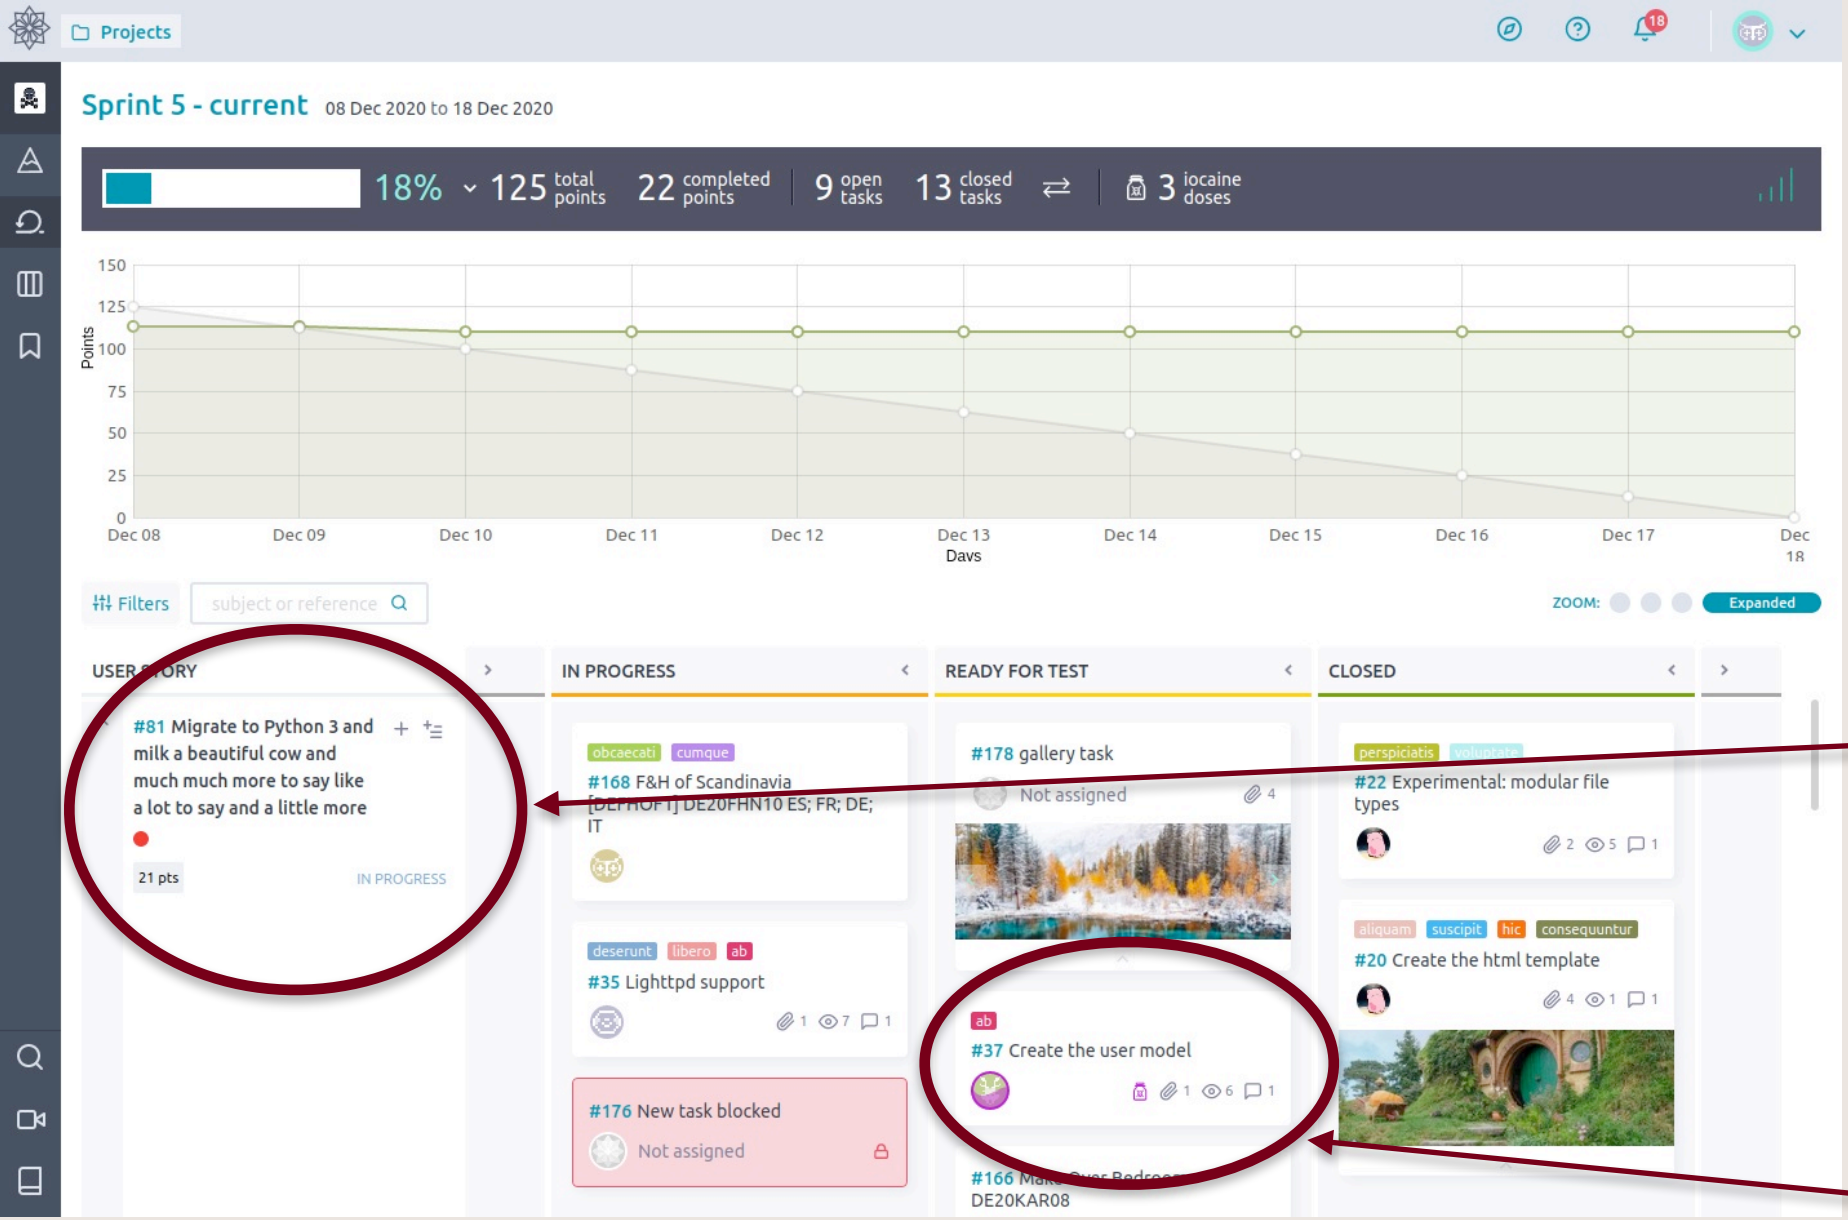

Agile and Scrum

- Backlog of ***User Stories***
- Divide time into sprints (each 1-2 weeks long)
- In beginning of each sprint:
  - Update backlog (Refinement)
  - Select 1-2 backlog items for this sprint (Sprint Planning)
  - Create (sub)tasks for each backlog item
- Every day: Daily Scrum meeting (~15 minutes)
- After each sprint: Deliver value to the customer
- Also: Sprint retrospective meeting

Scrum - Sprint Overview

User Stories

Tasks

- Assign to responsible
- Points
- Definition of done

Move tasks

SCRUMTESTPROJECT SPRINT 2 31 AUG 2022-14 SEP 2022
0%
0 total points
0 completed points
0 open tasks
0 closed tasks
0 iocaine doses
USER STORY
NEW
IN PROGRESS
READY FOR TEST
CLOSED
NEEDS INFO
Unassigned tasks
THIS COULD BE A TASK
Split Stories into tasks to track them separately
Martin Jacobsson
#5 Create code in the DB to check values
Martin Jacobsen
#6 Code graph code
Martin Jacobsson
#4 Code GW code

User Stories Points

Points is (relative) effort:

- E.g., 1 point ≈ 4 hours of work
- But you decide
- Aim for tasks with same amount of effort (if not: merge or split tasks)

Will be used to keep track of the members' contribution

Creating a User Story

User stories have a specific format:

"As a **[persona]**,
I want to **[do something]**
so that I can **[realize a reward]**"

Who is the user?

Why do they want to do this?
What is the benefit/reward?

https://www.alexandercowan.com/best-agile-user-story/

User Stories - An Example (1)

Epic:

As physician Philip, I want to X-ray my patient Pete so that I can make a proper diagnosis.

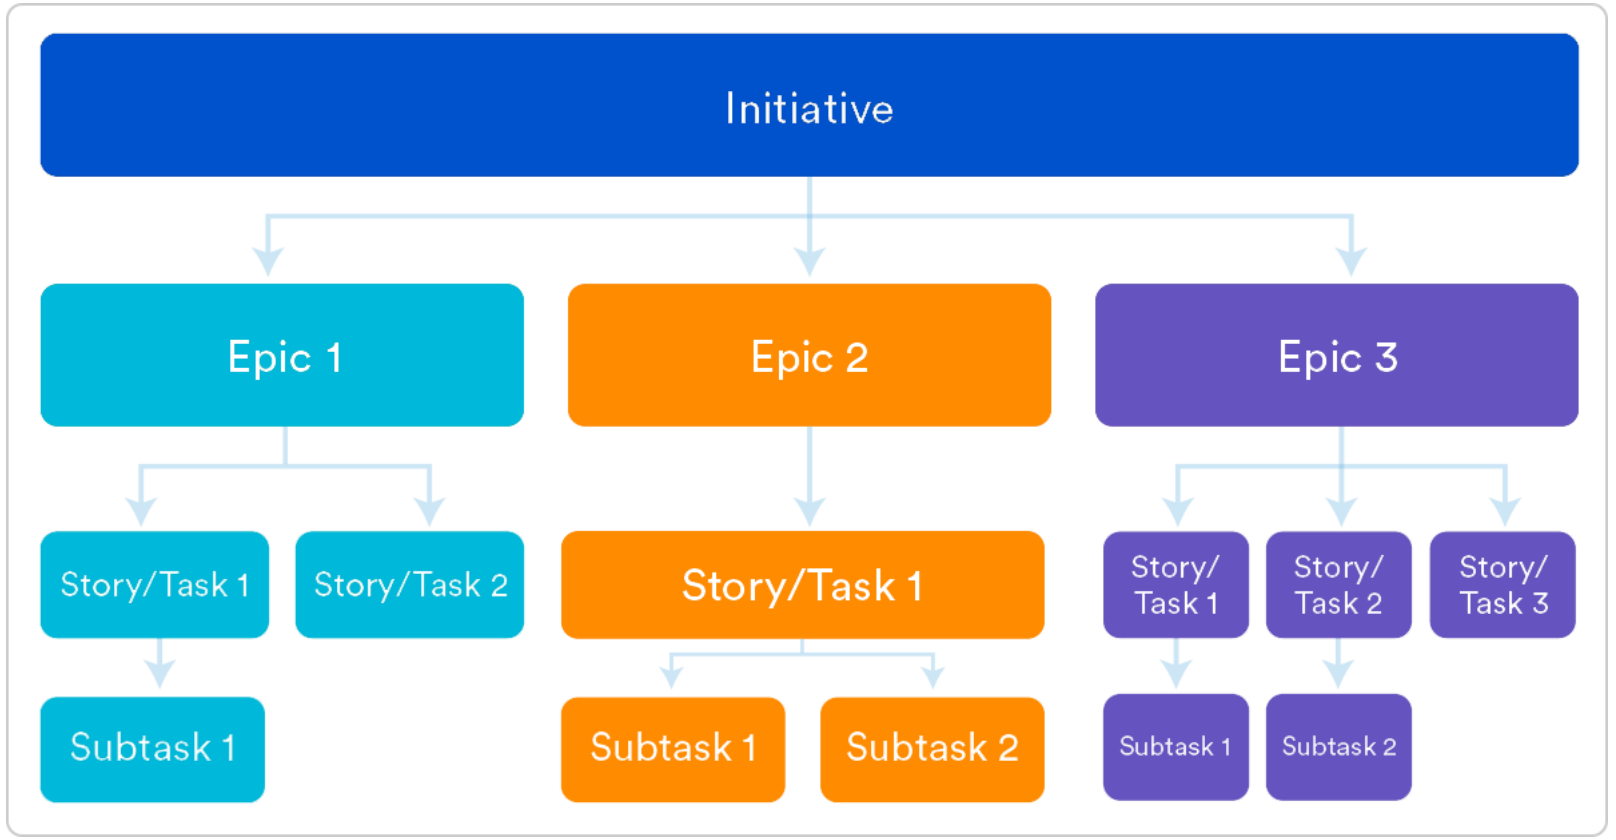

Story 1:

As physician Philip, I want to book a X-ray of the shoulder at the hospital with shortest queue so that the diagnosis is not delayed.

Story 2:

As physician Philip, I want to be notified when my patient Pete's X-ray image is ready so that the diagnosis can be made without delay.

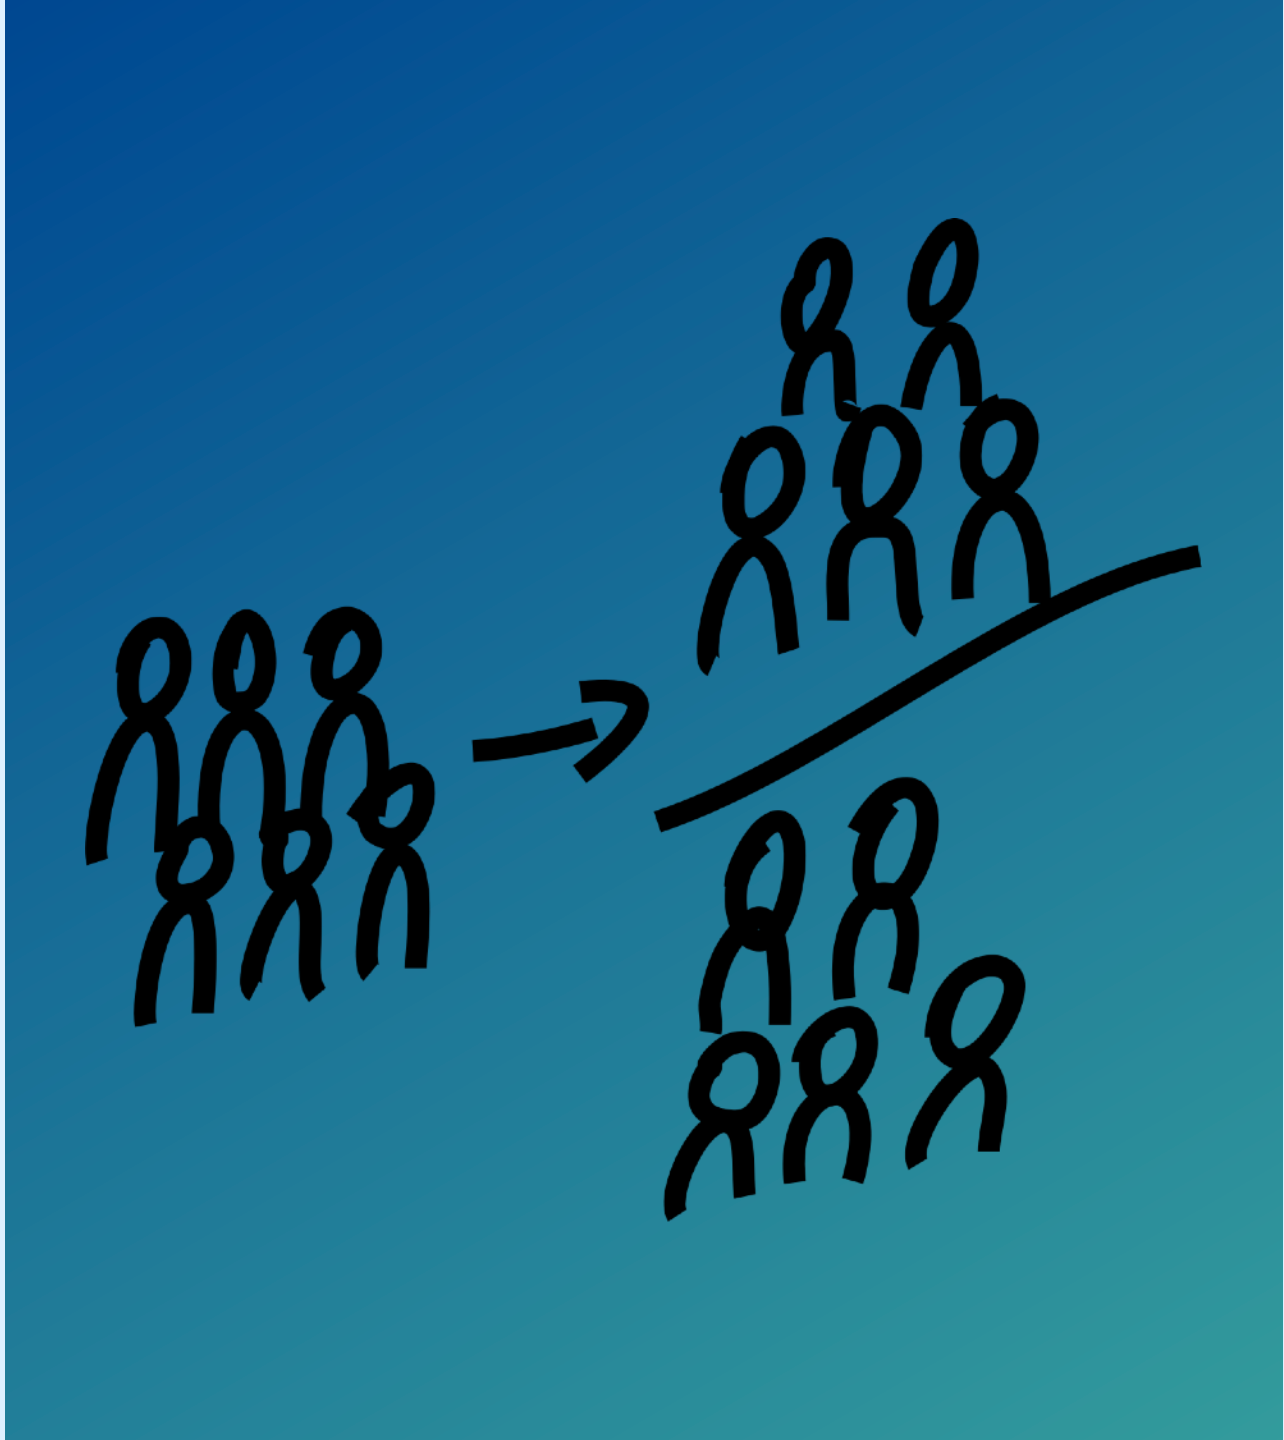

User Stories - Hierarchies

The π-Rule

Groups Dynamics

and more ...

Common Problems in Team Work

Discussion Exercise:

- List some common problems,
- Why are they problems?

Collaboration Contract

- First task of your project work:
  - Discuss how you want to work, communicate, delegate, deal with different opinions, etc.
  - Write it down in a short document.
- E.g., **What is a good team member**?

The Ten Principles of the Code of Honour

- Engineers in their professional capacity ought to feel personally responsible for technology being used in a manner that benefits humanity, the environment and society.
- Engineers ought to strive to improve technology and technological knowledge so as to achieve more efficient use of resources without harmful effects.
- Engineers ought to offer their knowledge in both public and private contexts so as to ensure the best possible basis for decisions and to illuminate both the opportunities and the risks associated with technology.
- Engineers ought not to work for or cooperate with companies and …

https://www.kth.se/en/student/studier/rattigheter-och-skyldigheter/uppforandekod-1.796562

As a student at KTH, I agree to uphold the following:

- I consider all people to be of equal value. All students and staff at KTH have the same rights, opportunities and obligations, regardless of sex, transgender identity or expression, ethnicity, religion or other belief, disability, sexual orientation or age.
- Equal treatment at KTH implies a respectful and inclusive work and study environment free from harassment, sexual harassment, discrimination and offensive behaviour. I, like every student and employee, have a responsibility to treat others with respect in all meetings and to promote a secure and prejudice-free study and work environment.
- I will always lead by example and maintain a professional approach to all meetings and in all my communication. I treat all students, staff and other partners with respect and consideration, irrespective of their social background, sex, transgender, identity or expression, ethnicity, religion or other belief, disability, sexual orientation or age.
- I am aware that discrimination, harassment, sexual harassment and victimisation

Delegation (or assignment of work items)

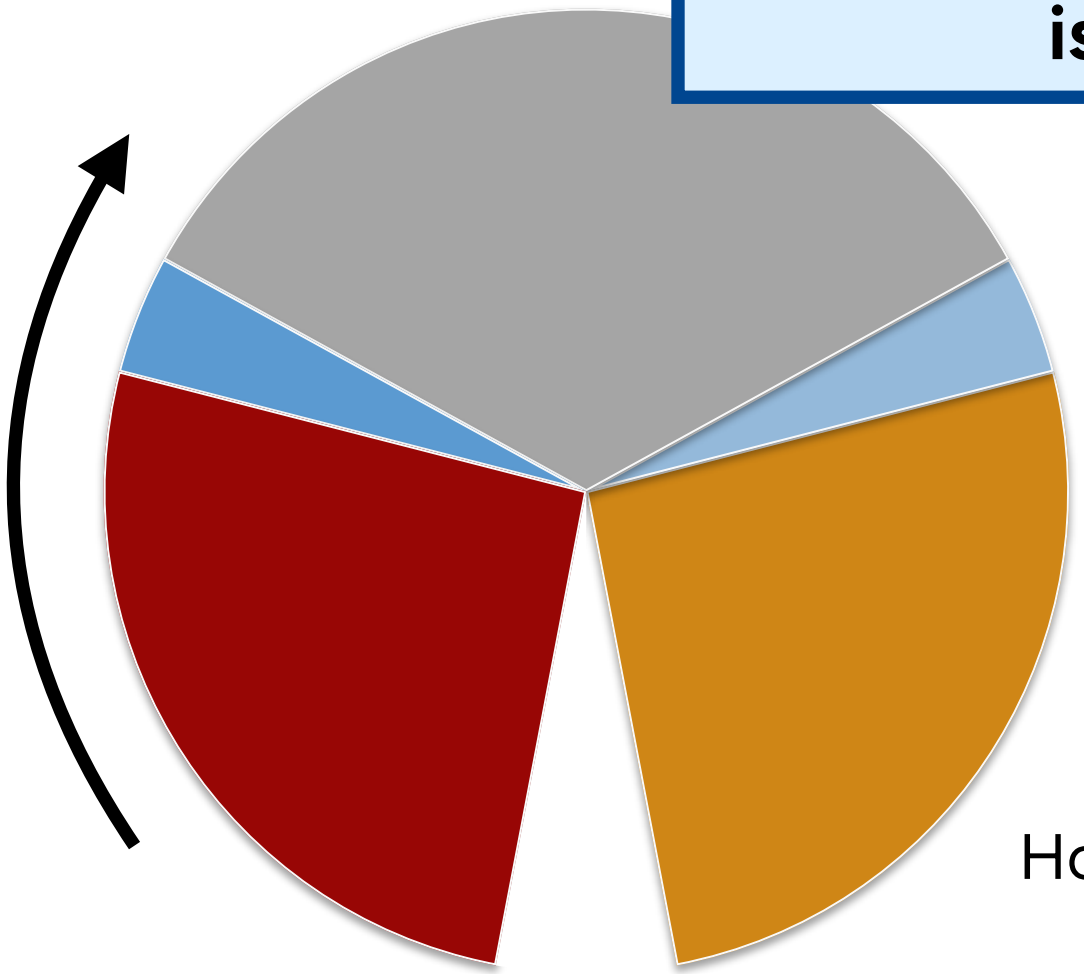

The Art of Not Doing It Yourself

Definition of Done (Acceptable Quality)

- If I do it, it will have the right quality
- I will have to re-do it anyway
- Excessive supervision

Use of expert knowledge (if available in the team)
Develop your team mate (might take time)
Motivates your team mates!

What if a new team member is added?

In - Out
Can I join?

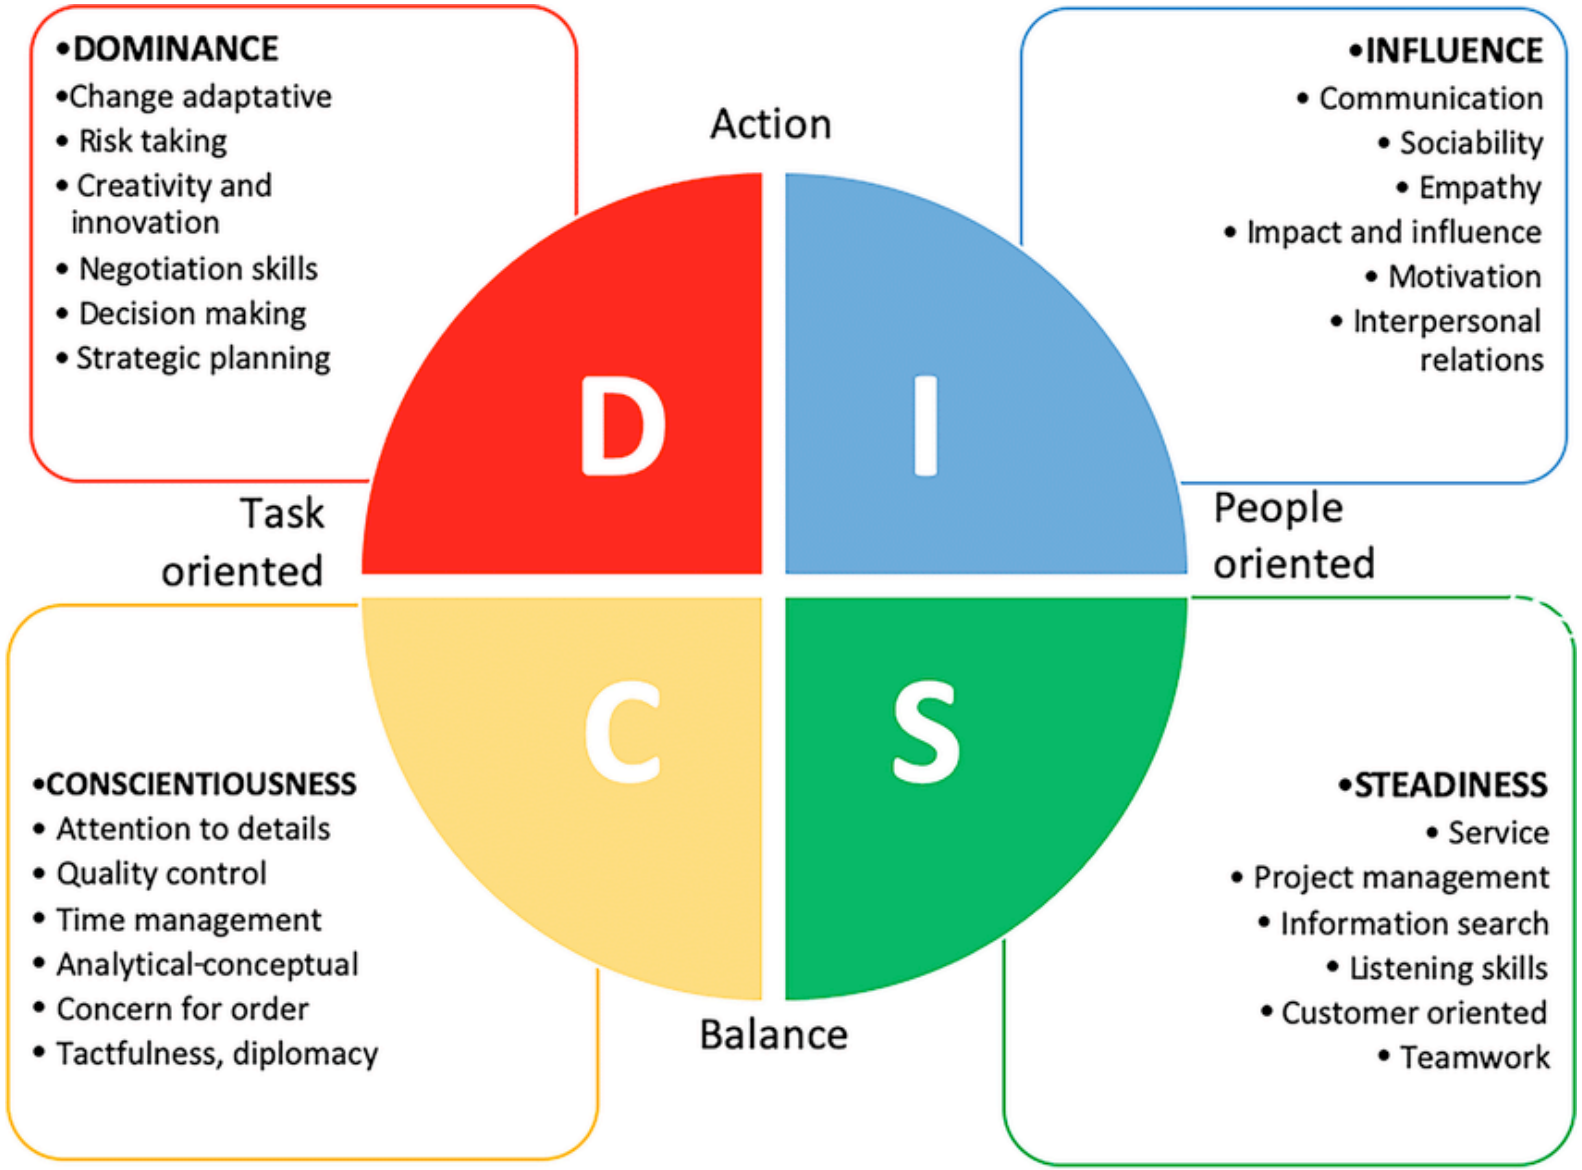

Close - Distant
How close relationship should we have?

Inclusion	Control	Affection
I include people	I control people	I am open with people
I want to include people	I want to control people	I want to be open with people
People include me	People control me	People are open with me
I want people to include me	I want people to control me	I want people to be open with me

DISC

William Moulton Marston (1928)

"DISC has not been shown to have any scientific validity"

The Big Five

Personalities Traits

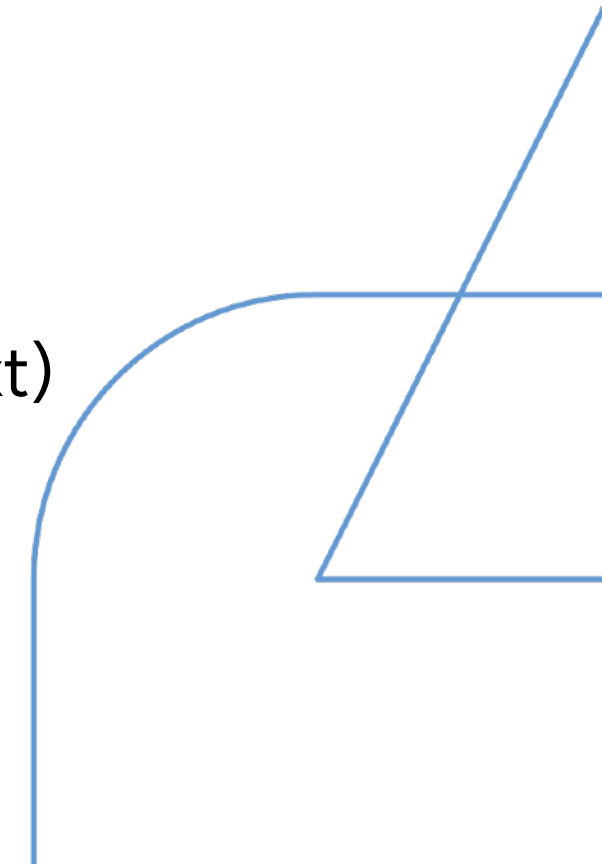

McCrae RR, Costa PT Jr. Validation of the five-factor model of personality across instruments and observers. J Pers Soc Psychol. 1987 Jan;52(1):81-90. doi: 10.1037//0022-3514.52.1.81.

Roles and Personalities

Who is:

- The project manager
- The project leader
- The real leader

A **role** is the behaviour of a person in a given group (context)

Roles and Personalities - Some Examples

- Doer (+goal oriented, +decisive, -inpatient)
- Co-ordinator (+organized, -inflexible)
- Teamworker (+social, +empathic, -conflict avoidance)
- Plant (+creative, +thinks out of the box, -unrealistic)
- Completer Finisher (+high standards, -zealous)
- Specialist (+knowledgeable, -no big picture)
- More: monitor/evaluator, communicator, negotiator, shaper, clown, the usual suspect, …
