Namn:

Personnummer:

Modern Physics SH1011 formulas and constants

Time dilation

Length contraction

Doppler shift

Relativistic energy and momentum

Photon energy

Photon momentum

Photoelectric effect

Atomic line spectra

X-ray production

Compton scattering

Stefan-Boltzmann law

Wien displacement law

de Broglie waves

Heisenberg's uncertainty principle

Wave function normalization

Atomic Energy Levels

Moseley's law

Angular momentum

Spin

Zeeman effect

Exclusion Principle, Quantum numbers

Molecules

p-n junction diode

Nuclear Radius

Nuclear Binding Energy

Radioactive Decay

Speed of light

Elementary Charge

Gravitational constant

Planck's constant

Boltzmann's constant

Electron rest energy

Proton rest energy

Neutron rest energy
